Remarks

LED 1: Function
LED 2: Operating voltage
The sensor is functional again after the overload has been eliminated.
Installed non-flush. For installation conditions see Instruction 939225.
Switching distance and tolerance data apply to the sensing surface location shown.
Installation: The sensor front edge must protrude at least 10 mm over metallic installation materials.
Sensor does not respond to loose aluminum chips on the sensing surface.
For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
